

Episode 6 show notes

Summary

In this conversation, Kristine Lium and Erik explore the intersection of performance art and AI, discussing how curiosity drives creative exploration and the importance of open dialogue about technology. They delve into the role of artists in the AI conversation, the creative process behind AI-generated music, and the potential of adaptive storytelling to engage diverse audiences. The discussion emphasizes the need for society to embrace AI as a tool for healing and understanding, rather than fear, and highlights the limitless possibilities that arise from co-creation between humans and AI.
